Sir: Applicants' Examiner Interview Summary

On April 23, 2003, the undersigned conducted a telephonic interview with SPE Carl Whitehead, Jr. as indicated on the interview summary mailed May 2003. Applicant sought consideration of his Request for Reconsideration, which he did not believe was receiving a proper evaluation. Claims 1-15 were discussed, along with the Examiner's failure to address Applicant's arguments, and misconstruing the principal references. As presented in Applicants' Request for Reconsideration filed April 21, 2003, Applicant explained, among other things, how the Han reference fails to disclose the formation of a body member using two angle implantations. It was also explained that Hshieh does not disclose or suggest the possibility of the blanket ion implantation of boron ions being directed at two different angles to the surface plane of the device. Consequently, Mr. Whitehead agreed that he should withdraw the final rejection, and that the Office should consider the request for reconsideration and then issue a new Office Action.

Respectfully submitted,

Steven J. Henry
